

STUDENT HOUSING

HOUSING

A new Student Housing Complex is proposed for development on campus to support Compton College's students in need. The complex will be designed to support a diverse student population with a variety of needs and interests. The proposed location for the development is adjacent to parking and ties into the network of pedestrian paths that connect to all areas of the campus. Students who live on campus will be able to access many of the services currently provided on campus, including counseling, career services, tutoring, childcare and health/wellness.

COMMUNITIES

The design concept illustrated on the campus plan is based on discussions with the Tartar Support Network and the broader campus community. Preliminary concepts that emerged from planning discussions included the idea of creating two communities designed around courtyards. One community would be traditional dormitory style with two beds per room and shared restrooms. The second community would be for families or older/returning students and include studios and one bedrooms. Shared study lounges, kitchens, laundry rooms, and outdoor gathering areas are included throughout to support collaboration and create a sense of community.

FOOD SERVICE & OUTDOOR GATHERING

On the south side of the development, a new Campus Cafeteria is proposed. This will support the entire campus community and integrate the student housing into the campus fabric. Outdoor seating and collaboration areas will be developed to support a variety of activities and will become a hub for students to study, socialize, study, and help each other succeed.
